

National Science Foundation travel support for the

Research Term on Analysis and Geometry in Metric Spaces

April 1 - June 30, 2015
www.icmat.es/RT/AGMS2015

The U.S. National Science Foundation has provided funds to support U.S. researchers' participation in the research term on Analysis and Geometry in Metric Spaces to be held at ICMAT in Madrid, Spain from April-June 2015. It is anticipated that supported individuals will be reimbursed for airfare (max \$1600), conference registration, and a small allowance to partially offset housing costs (\$85 per day for up to 14 days during the research term). Preference will be given to applicants who are in the early stages of their careers (graduate students and non-tenured, non-funded faculty) and applicants from underrepresented groups.

Interested individuals can apply for funding by sending the following to Marie Snipes (snipesm@kenyon.edu):

- A brief (1-2 pages) CV, and
- EITHER a brief letter of support from your advisor (for graduate students)
- OR a brief statement explaining the importance of the workshop to your research program.

Full consideration will be given to all applications submitted before March 1, 2015, but applications received after that date will be considered as long as funding remains.
