	Tuesday		
ROOM	Salón de Actos (Auditorium)		
Chairpersons	P. Bates		
9:30-10:30	**Rafael de la Llave** (Hale Lect 1) (Georgia Institute of Technology, USA) "Two directions for the future"		
10:30-11:00	Coffee Break		
11:00-12:00	**Rachel Kuske** (Georgia Institute of Technology, USA) "Computer-assisted global analysis of energy transfer in vibro-impact configurations"		
12:00-13:00	**Eiji Yanagida** (University of Tokyo, Japan) "Positive solutions of the heat equation with a moving singular potential"		
13:00-14:30	Lunch		
ROOMS	Sala Azul (Blue Room)	Sala Naranja (Orange Room)	Sala Gris (Grey Room)
Chairpersons	J. Fernandes	Alicja B. Kubik	N. Cónsul
14:30-15:00	**Alexandre N. Carvalho** (University of São Paulo, Brazil) "Gradient structure of non-autonomous cascade systems"	**Michael Li** (University of Alberta, Canada) "An Epidemic Enigma: Challenges in Modeling the 1978 Influenza Epidemic"	**Jan W. Cholewa** (University of Silesia in Katowice, Poland) "On exponential decay in time for fractional Schrödinger parabolic problems"
15:00-15:30	**Stefanie Sonner** (Radboud University Nijmegen, Netherlands) "A panoramic view of exponential attractors"	**Xingfou Zou** (Western University, Canada) "Spatial temporal dynamics of a diffusive Nicholson blowfly equation with two shifting parameters"	**Marta Pellicer** (Universitat de Girona, Spain) "On the exponential decay in some simple chromatographic models"
15:30-16:00	Coffee Break		
Chairpersons	S. Sonner	T. Krisztin	S. Wang
16:00-16:30	**Christian Pötzsche** (Alpen-Adria University of Klagenfourt, Austria) "From invariant manifolds to fiber bundles: numerical dynamics of integro difference equations"	**Tomás Caraballo** (Universidad de Sevilla, Spain) "Dynamics of infinite-dimensional systems with memory"	**Wen Huang** (University of Science and Technology, China) "Typical periodic optimization for dynamical systems: Symbolic dynamics"
16:30-17:00	**Juliana Fernandes** (Universidade Federal de Rio de Janeiro, Brazil) "On Bifurcation from Infinity: A Compactification Approach"	**Jaqueline Mesquita** (Universidade Estadual de Campinas, Brazil) "Stability results for functional Volterra-Stieltjes integral equations and applications"	**Xiaoying Han** (Auburn University, USA) "Dynamics of lattice neural network models with random inputs"
17:00-17:15	**Simone M. Bruschi** (George Mason University, USA) "E-compact convergence and interpolation spaces"	**Luke T. Peterson** (University of Texas at Austin, USA) "Eective Stability of Near-Rectilinear Halo Orbits in the Earth-Moon System"	**F.Javier Larcada** (Universidad Complutense de Madrid, Spain) "Low regularity perturbations of linear non-autonomous parabolic problems"
17:15-17:30	**José Manuel Uzal** (Universidad Complutense de Madrid, Spain) "Relations between different attractors related to impulsive dynamical systems"	**Alicja B. Kubik** (Universidad Politécnica de Madrid, Spain) "Results on joint observability-identifiability for autonomous ODE systems"	**Pablo Molina** (Universidad Complutense de Madrid, Spain) "Fractional Diffusion in the Bessel Potential Scale: Smoothing and Low-Regularity Perturbations"

20:30-....	Conference Banquet
