EXTREMIZABILITY OF FOURIER RESTRICTION TO THE PARABOLOID

SPEAKER: Betsy Stovall (University of Wisconsin-Madison)

VENUE: Aula 520, Módulo 17, Departamento Matemáticas, UAM

DATE: Tuesday, 13 November 2018 - 15:00

ABSTRACT: We will show that for almost all valid $L^p(\mathbb{R}^{d+1}) \rightarrow L^q(\mathbb{P}^d)$ restriction inequalities, there exist functions of $L^p(\mathbb{R}^{d+1})$ norm 1 whose extensions have $L^q(\mathbb{P}^d)$ norm equal to the operator norm. As time permits, we will also discuss related questions for other Fourier restriction/extension operators.
